Main Goal of sprint Appify idea is "Create an app to raise efficiency for teams working in Procurement, Warehouse and Planning"

The 6 stories of sprint "Appify idea" bring benefits for 3 groups of users: Buyer, Procurement Director and Warehouse Manager. See the reasons why these stories are important to each stakeholder below.

Buyer will have the benefit that a product never runs out of stock with story AIO-1-Purchase products from existing suppliers and that they speed up their work with story AIO-5-Repeat past purchase.

Procurement Director can be sure that they can negotiate prices with partners in advance and get better deals, increasing the profit margins with story AIO-4-See demand forecast.

Warehouse Manager will have the benefit that they can assess if the targets and deadlines are being met with story AIO-2-See purchases of the day, that they can prepare racks on the warehouse and notify the gatekeeper with story AIO-3-Get notified of new purchases and that they can plan stock locations and make sure there are enough people to handle it with story AIO-7-See agenda for the week.

Which requests are stakeholders asking for and are being addressed in this sprint? Check out the requests that will be implemented by team Alpha, listed by stakeholders:

Buyer

Group of stakeholders Buyer indicated in 2 stories that they want to purchase products from selected suppliers and repeat a past purchase.
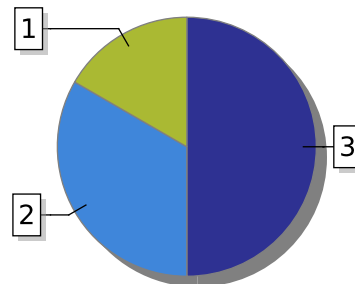

Procurement Director

Group of stakeholders Procurement Director indicated in one story that they want to see the expected demand for a certain product.

Warehouse Manager

Group of stakeholders Warehouse Manager indicated in 3 stories that they want to check how many purchases were completed today, know when a new purchase was made and see a calendar containing the loads expected in this week.

Stories per Stakeholder

Legend:
- Warehouse Manager
- Buyer
- Procurement Director

About Sprints: A sprint is a short, time-boxed period when a scrum team works to complete a set amount of work. Sprints help teams follow the agile principle of "delivering working software frequently," as well as live the agile value of "responding to change over following a plan." [1]

This sprint is set to start in 8 day(s) and should take 18 day(s) to finish, on April 23 (Friday). Get in touch with team Alpha for instructions on how to use the product and attend the Sprint Review (demo), which is planned for Wednesday - April 28.

What's next in the roadmap?

A product roadmap is a plan of action for how a product or solution will evolve. Product owners use roadmaps to outline future product functionality and when new features will be released.[2]

In Jira, roadmaps are expressed as epics, described below:

⚡ MVP

This epic "Basic app allowing buyers to see the week's agenda, demand forecast, and buy a few selected products" contains 3 stories, 3 of them in this sprint. The planned date to fully implement this epic is March 31, 2021.

⚡ IMPROVE BUYERS' EXPERIENCE

This epic "Add features to improve the Buyers workflow, especially task execution speed" contains 4 stories, 2 of them in this sprint. The other 2 stories are AIO-8 Share agenda with others and AIO-6 Process Payments. The planned date to fully implement this epic is May 11, 2021.

⚡ INTEGRATE WITH PARTNERS

This epic "Focus on integrating the Procurement App with more third-party systems" contains 3 stories, 1 of them in this sprint. The other 2 stories are AIO-20 Integrate with Partner Y and AIO-19 Integrate with Partner X. The planned date to fully implement this epic is June 18, 2021.
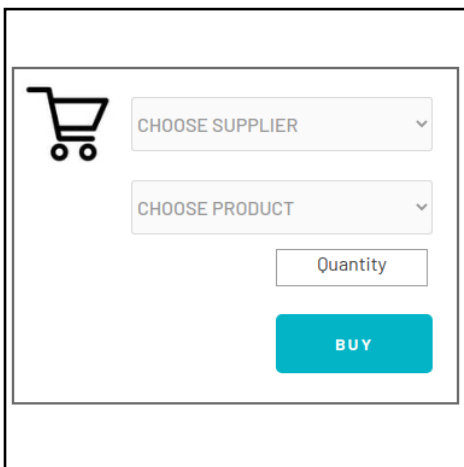

What happened before? 🕐

Before this sprint we had sprint Design Sprint, whose goal was "Test ideas and prototypes with stakeholders". It was completed on March 18, 2021.
